

Santiago de Chile, March 2017

Invitation Letter
Mr. Cris Hernandez

Through this letter, I am pleased to invite Mr. Cris Hernández, Director of Ligen-Octal initiative, to make an academic interest visit to the Fablab UC during the last week of March 2017.

We extend this invitation in relation to the quality of the work developed by Mr. Hernández in Data Visualization projects. It is expected that during this visit, a series of workshops and talks will be held, and that they will participate in working meetings related to the OCTAL project, to explore potential collaboration networks that will allow the project to be developed.

FabLab UC is committed to providing its facilities to carry out the activities that Mr. Hernández can develop during his visit.

The Fablab UC is a workspace open to students and general public, exploring the creative possibilities related to digital manufacturing, prototyping and the relationship between Engineering and Design.

Without another particular subject, sincerely
